Submit Ticket

- Utilizatorii pot realiza tichete pentru a menționa anumite probleme, întrebări sau update-uri în cadrul aplicației

- Pe partea de tichete, utilizatorul poate vedea detalii despre toate tichetele prezente și poate răspunde la un tichet, atâta timp cât un alt utilizator nu a răspuns deja la el.

Metoda de a răspunde la un tichet:

The screenshot displays the 'BUGTRACKER TEAM DEVELOPMENT' web application. In the top right corner, there is a 'New Ticket' button and icons for settings and help. The left sidebar contains a navigation menu with 'Dashboard', 'Projects' (with sub-items 'All Projects' and 'My Projects'), and 'Tickets' (with sub-items 'All Tickets', 'My Tickets', and 'Create Ticket'). The main content area is titled 'Solve ticket' and features a 'Create a Ticket' form. The form includes fields for 'Ticket Title' (containing 'Create Project Table'), 'Ticket Description' (with a rich text editor toolbar and the same text), 'Ticket Response' (with a rich text editor toolbar and a placeholder 'Add a response...'), 'Ticket Priority' (a dropdown menu set to 'Urgent'), 'Ticket Type' (a dropdown menu set to 'Bug'), and 'End date' (a date picker set to '09/05/2023'). At the bottom of the form are two buttons: 'Save Changes' and 'Submit Ticket'.
